

Lively Technical College Aviation Maintenance Technology FAA Requirements and Cost

A student that completes the aviation maintenance technician training from an (FAA approved FAR 147) AMT school such as Lively Technical College must take and pass the FAA General, Airframe and Powerplant written (knowledge) test. The written knowledge test minimum pass score is 70 percent for each subject area. Passing the written knowledge test is a prerequisite to then take the oral and practical test that must be taken with a FAA Designated Maintenance Examiner (DME). To receive a FAA Airframe & Powerplant certificate it is required to pass the written knowledge test for General, Airframe and Powerplant including passing an Oral and Practical test with a FAA DME to be issued a FAA Mechanic certificate. A student may take all testing required to receive a certificate for Airframe and Powerplant combined. Or may elect to take testing for General and Airframe or General and Powerplant and be issued a certificate for only the Airframe or Powerplant separately. General Oral and Practical needs only to be taken once with Airframe or Powerplant.

Once the Airframe or Powerplant course is completed and a person is issued a FAA 147 Graduation certificate from Lively Technical College, any written test may be taken at a designated FAA Testing Center, to include the Lively Technical College Testing Center. The following are local testing sites:

Lively Technical College Testing Center: 850.487.7410 (<https://www.livelytech.com/resources/testing-center/>)

Florida Aviation Center: 850.778.3591 (<https://www.flaviationcenter.com/faa-testing>)

An applicant must create an account with <https://faa.psiexams.com/faa/login> in order to schedule, pay and receive a tracking number for the written test.

A FAA 147 graduation certificate with a school number will be needed to complete the registration process to take the written test for General, Airframe and Powerplant.

In order to take the Oral and Practical for General, Airframe or Powerplant contact the (Designated Maintenance Examiner) Joseph Garcia at garciaj@leonschools.net or call (850) 591-3039 to schedule an appointment. The oral and practical is given at Lively Technical College located at Tallahassee Airport 3290 Capital Circle SW Tallahassee Florida 32310.

The cost of the written knowledge tests and oral and practical are as 2022:

Written test may be taken at the Lively Testing Center, Florida Aviation Center or any FAA designated testing center.

General	\$175.00
Airframe	\$175.00
Powerplant	\$175.00

Oral and Practical may be taken with FAA DME Joseph Garcia Located at Lively Technical College or any FAA DME at another facility.

General plus one rating (Airframe or Powerplant)	\$530.00
Additional rating (Airframe or Powerplant)	\$265.00
General, Airframe and Powerplant (if testing all at same time)	\$795.00

**Total minimum cost of FAA Certification testing after training with
Lively Technical College:**

\$1,320.00
