Program Delivery Mode:

Hybrid:

Programs that are offered through a **HYBRID** delivery model combine face-to-face classroom instruction with online learning activities. During classroom instruction time, students can be engaged in authentic, collaborative learning experiences. The online components may include multimedia-enhanced content and channels for ongoing discussion. Students enrolled in a course that is delivered through a hybrid delivery model are encouraged to have computer and internet access at home.

Traditional:

Programs offered through a **TRADITIONAL** delivery model involves instruction taking place between an instructor and students where students are physically present on campus.
